# Tractor & combine harvester sales in South Africa: up to April 2025

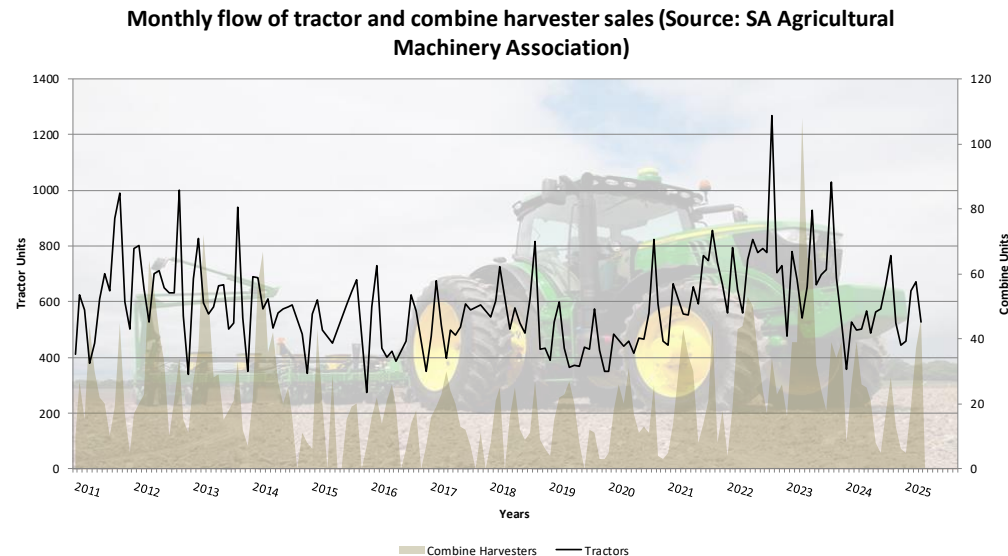

09 June 2025

# Indemnity

---

The Western Cape Department of Agriculture prepared this data/information as accurately as possible. However, as this document contains data from various sources, its correctness cannot be guaranteed. Any person using this information will be doing so at own risk and the said organisation or any other party will under no circumstances be responsible for any loss suffered by any person/organisation using the information contained in this document.

# Monthly sales trends (Source: SA Agricultural Machinery Association)

- April **tractor sales** of 527 units were approximately 5% more than the 500 units sold in April last year. Year-to-date tractor sales are now almost 22% up on last year.
- Forty-six **combine harvesters** were sold in April, 20 more than the 26 units sold in April last year. On a year-to-date basis, combine harvester sales are now approximately 37% up on last year.
- Current predictions are that tractor sales will be similar, or marginally more, than the 6 463 units sold last year. Combine harvester sales in 2025 also look as though they are going to be higher than the 201 machines sold last year.
